

GLYCOL RADIATOR COOLANT

PRODUCT DESCRIPTION

GLYCOL Radiator Coolant is a premium quality, single-phase, ethylene glycol based product. This product provides excellent heat rejecting aluminum protection for all automotive and light duty diesel applications. It also provides outstanding protection for heavy-duty diesel applications when combined with supplemental coolant additives. GLYCOL Radiator Coolant protects all commons cooling system metals including solder, copper, brass, steel, cast iron and aluminum. This formulation is compatible with all other major brands of coolant and will not affect automotive hoses and gaskets.

GLYCOL Radiator Coolant is recommended for automotive and trucks cooling systems. It contains an effective defoamer to prevent foaming in the cooling system for the life of coolant.

GLYCOL Radiator Coolant is recommended for use in all automobiles requiring ethylene glycol based coolant.

APPLICATIONS / BENEFITS

- ❑ Compatible with most commercial coolants.
- ❑ Provides excellent heat rejecting properties.
- ❑ Protects most metal in cooling systems.

TYPICAL CHARACTERISTICS

TEST DESCRIPTION	METHOD	TYPICAL RESULTS
Specific Gravity @ 15°C	ASTM D-4052	1.014
Freezing Point, °C	ASTM D97	- 6
Boiling Point, °C	Reflux	108
Color	Visual	Green
